PageScope Mobile

By Konica Minolta Business Technologies Inc.

Konica Minolta PageScope Mobile is an application that will allow you to easily connect to Konica Minolta printing devices from your iPhone, iPod touch, iPad and Android device*. Furthermore, it will enable you to print documents and E-mails as well as importing scanned data.

Main Features:

Print Function

- Print documents in "My Documents" folder: Allows you to print saved documents
- Mail: Mail texts and attachments can be printed.
- Web Browser: Web pages can be printed or saved as PDF files into My Documents.
- Camera (iPhone/iPod touch only): Print images that have been saved into Photo albums.
- Supports Authentication and Secure Print to provide you with a more secure printing environment.
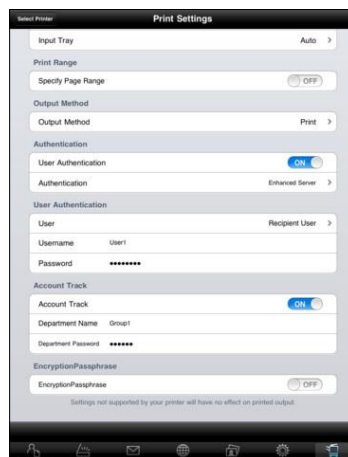

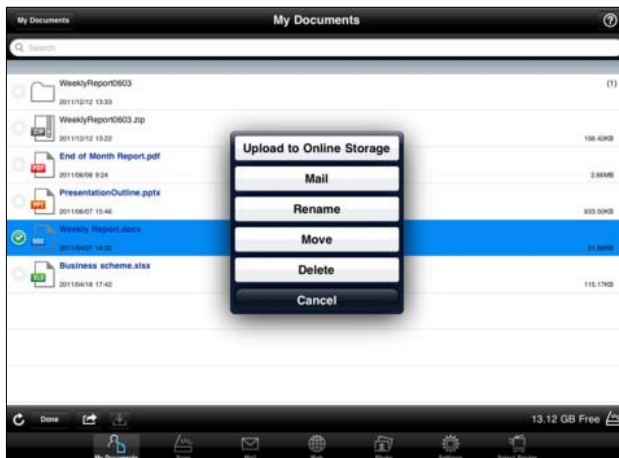

Scan Function

- Data that has been scanned from printing devices, etc. can be saved into My Documents.

Cloud Services Support

- Print documents that have been saved in cloud services.
- Documents and scanned data can be uploaded to the cloud.
- The cloud services supported: GoogleDocs, iCloud, Evernote, Dropbox, MS Office365

Example iPad Screenshots:

Supported Formats for Print/Preview Functions
- JPEG/GIF/BMP/PNG
- PDF 1.4/1.5/1.6/1.7, Compact PDF, Encrypted PDF
- TIFF 6.0 (Zipped colour TIFFs for Print functions only)
- XPS (for Print)
- OpenXML(docx,xlsx,pptx)(bizhub C754/C654/C554/C454/C364/C284/C224 Only)
- DOC/XLS /PPT (Only for Previewing functions)

Precautions
- There may be occasions when large-sized files or mail messages cannot be displayed.
- If the resolution of the scanned data is high, the behavior of the preview function may become unstable. To stabilize its behavior, scan using the default resolution.
- Files that are created in incompatible file formats are not supported (MS-Office documents such as DOC, XLS, PPT, Encrypted PDF (256-bit AES), Colour TIFF, XPS, etc.)
- Depending on the web page layout, the function to print the entire web page may not work properly.
- A significant amount of memory is required to print an entire web page, HTML mail and Emails that contain characters written in languages other than Latin. Therefore, there may be times when these print jobs cannot be printed due to the memory state of device.
