

Brexit Statement - regarding Consumables and Parts for MFDs and Printers

The decision of the UK government to leave the European Union, better known as 'Brexit', means that Capital Document Solutions must be well-prepared to deal with the challenges this event may present in terms of the supply of equipment, parts and consumables.

We understand that many clients may have concerns about how this could affect the availability of supplies for their print devices.

Inevitably there is still a great deal of uncertainty. However, we are doing all we can to minimise any potential risks which may arise by working closely with our suppliers.

For clients with a service contract

For client contracts where we provide consumables (parts, toner, staples etc) to keep devices running on an inclusive copy/print cost, we have already taken delivery of two months' additional stock. The manufacturers are also stockpiling parts and supplies in the UK and have looked at alternative methods of importing their products through different ports and the possibilities of by-passing Europe altogether.

For clients that "pay per order" for supplies and parts

We would recommend clients look to purchase additional stock to cover their requirements as early as possible.

We will continue to review our position as more information is provided by the government.
